Sock Puppets+ allows users to choose a sock puppet, background, props and add a voice recording. Videos can be placed in the camera roll for Edmodo or Dropbox export.

Getting Started
1. Click New.
2. Choose a character by tapping a character icon. Choose up to 4 characters.
3. Tap Next located in the bottom right corner.
4. Select Background(s). Choose up to 5 backgrounds.
   
   Import option: Select an image from your camera roll for your background.
5. Tap Next.
6. Choose Props. Note: Items with a yellow border can move when recording. Items in red do not move while recording. 4 props can be added to a scene.
7. Tap Next.

The stage appears with your characters, props and background options.

Record
1. Press the record button in the top toolbar. You have 90 seconds to record. *There is not a pause button.
2. Tap a character and a red arrow appears. This denotes which character is speaking.
3. Characters and props can move during the movie by tapping and dragging the item.
4. Change the background from the right toolbar as you record.
Save and Share
